Objective

M.Sc. Informatics graduate with hands-on experience in Frontend Development, React.js, JavaScript, Python, and Computer Vision. Built interactive web applications, virtual laboratory simulations, and machine learning projects using modern web technologies. Passionate about creating responsive, user-centric applications and seeking opportunities as a Frontend Developer or Software Developer.

Education

M.Sc. Informatics(2026)

University of Delhi, South Campus

B.Sc. (H) Electronic science

Acharya Narendra Dev College, University of Delhi

CGPA: 7.47/10

Technical Skills

- Languages: Python, JavaScript (ES6+), HTML5, CSS3
- Frontend: React.js, Bootstrap, Responsive Web Design, Three.js
- Libraries & Frameworks: OpenCV, TensorFlow, NumPy, Matplotlib, Cannon.js
- Tools: Git, GitHub
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Computer Vision

Projects

Gameified Resume Portfolio | React.js, Three.js, Cannon.js

- Developed an interactive 3D portfolio website showcasing technical skills, projects, and academic background.
- Implemented responsive design principles to ensure seamless user experience across devices.
- Utilized Three.js and Cannon.js to create immersive animations and interactive elements.

Elite Summer Fellowship Program – Virtual Lab Simulation | HTML, CSS, JavaScript

- Developed a fully interactive virtual laboratory simulation of the JK Master-Slave Flip-Flop experiment.
- Engineered core application logic in JavaScript to simulate circuit behavior based on J, K, and Clock inputs.
- Designed a responsive user interface enabling real-time visualization of Q and Q' outputs.
- Delivered a web-based educational tool to improve understanding of digital electronics concepts.

Intelligent Face Mask Detection and Alert System | Python, OpenCV, TensorFlow, Arduino Uno

- Built a real-time face mask detection system using computer vision and machine learning techniques.
- Integrated Arduino Uno hardware to trigger alerts based on mask detection results.
- Applied OpenCV and TensorFlow for image processing and classification tasks.
- Research work published in the Aurobindo College Journal of Research and Studies.

Achievements

- Research paper published in Aurobindo College Journal of Research and Studies.
- Successfully completed Elite Summer Fellowship Program and developed a virtual laboratory simulation project.
